Available for up to eight months beginning May 2018

RELEVANT SKILLS, EXPERIENCES AND ACCOMPLISHMENTS

Technical Skills
- Server side programming languages and technologies such as Java, C++, C, Python, Javascript, Node.js and Express
- Client side programming languages and technologies such as Javascript, HTML, Bootstrap and CSS from numerous websites I developed, most notably a website for a family friend's flooring company and a website displaying Ottawa's architecture and street art
- Working knowledge of Mac OS, Windows and Linux operating systems
- Working knowledge of Git and GitHub
- Set up and used nginx for local web development
- Used ScrollReveal scrolling animations in the developments of a website displaying Ottawa's architecture and street art
- Basic network communication understanding, http/https protocols

Communication and Leadership Skills
- Fluent (reading, writing and oral) in English, French, Romanian, Russian and currently learning Spanish
- Clearly and effectively conducted presentations on various subjects in English, French and Spanish through my university and high school career. Specifically, I received the highest mark among 19 other groups for presenting an in-depth analysis of "The Role of Motivation at Shopify" as part of a business course at Carleton.
- Communicated effectively with many different coworkers, customers, waiters, chefs and supervisors while always remaining pleasant and cordial as a hostess at Lonestar Texas Grill

- Effectively mentored peers by enabling them to discover what it takes to be successful during their transition into high school and helped facilitate their success through planning and leading various group activities, academic follow-ups and regular interactions

WORK EXPERIENCE

Hostess   June 2016 - August 2016, May 2017 - August 2017
Lonestar Texas Grill, Ottawa, Ontario
- Managed the efficient and timely admission of guests within one of the most popular restaurants in Ottawa, while assuring that each member of the serving staff is capable of providing the highest quality of service to each guest
- A high level of customer satisfaction was achieved through exhibited strong leadership, customer service, communication and teamwork skills within a fast paced environment

APPLIED PROJECTS

Ottawa Art and Architecture   **August 2017**
- Developed an interactive website using HTML, CSS, JavaScript and multiple JavaScript libraries to display the various street art and architecture that can be found throughout the streets of Ottawa
- https://github.com/mipulbere/OttawaArchitecture

IP Detector   **July 2017**
- Developed a web application to identify a user's IP address, gathering data about the amount of requests made for the address and the last request time, from the click of a button. This application was completed using client and server side programming in Node.js, HTML and CSS
- https://github.com/mipulbere/IP-detector

Micel Flooring   **July 2015**
- Developed a sample website for a flooring company using HTML, Bootstarp and CSS.
- https://github.com/mipulbere/website
